C.E.O's and company directors as well as the high-level management executives belonging to the private sector or government institutions, being Belgian or international organizations established in Belgium, constitute the occupational category mostly represented, i.e. over 70 % of our readership. The residual third gathers the professionals belonging to scientific and intellectual domains such as doctors, lawyers, academic professors and researchers, lobbyists and journalists working in our country. Our readership thus is constituted of all those decision-makers living and working in Belgium, and of course also in- and outside Brussels, and belonging to the economical, financial, political, administrative, diplomatic, scientific and cultural circles of authority.

The three-quarters of our readers are Belgian citizens, the last quarter covering the full spectrum of foreign nationals living and working mostly in and around the Brussels Region.
