“Regions are essential catalysts to ensuring the development of an offshore renewables industry in Europe. Facilitating the partnership between local communities, developers, utilities, research centers and academics, they often drive these local partnerships or clusters of excellence, which allow the development of the offshore renewables industry and the regeneration of their territories. Capital investments are also a key issue that regions need to address, and the consortium will invite the European Investment Bank to discuss the existing financial facilities. This workshop will explore the catalysing role of European regions and facilitate exchanges of best practices and experiences among the participants through networking.”

Speakers:

Moderator: Hans Van Steen, Head of Unit Renewable Energy, Eur. Commission, DG Energy
Steve Clarke, Mainstream Renewable Power (UK)
Kristin Lang, European Investment Bank EIB (Luxembourg)
Gloria Rodrigues, European Wind Energy Association, EWEA (BE)
Nathalie Rousseau, European Ocean Energy Association, EU-OEA (BE)
